72 Pencil Tub
Ref: 0700804
Contents:
3 pencils of each of the 24 colours.

...I pushed the material to its limit and wasn't disappointed. Dry, the subtle colour range is a joy to work with and wet almost luminescent.
Stephen Ormerod

...Derwent produce the finest pencils in the business and the Graphitint range is no exception. This unique range of 24 pencils with a smooth texture on application, makes drawing easier and more interesting with the original colour tint to the graphite. The pencils also have the added bonus of being watersoluble which will add another dimension to any drawing. On the whole, a great product for great drawings."

A range of 24 coloured soluble graphite pencils

DERWENT

GRAPHITINT

...Graphite with a twist

Derwent Graphitint is an exciting new drawing pencil which combines the drama and creativity of the graphite medium with a hint of soft, subtle colour. Available in 24 fabulous colour tints, Graphitint can be used wet or dry to produce an amazing range of tinted graphite effects. Graphitint has been enthusiastically received by all who have tried it, and will appeal to any artist seeking a new medium that is highly creative and a little bit different.

Used dry like a conventional pencil, Graphitint produces soft tones of grey with just a suggestion of colour. Add water and the colours become far more vibrant. The colours can be lightened or removed with a soft eraser or by lifting out with a brush and clean water. Colour tints range from soft greys, blues and greens to glowing russets, plums and browns. All can be mixed and blended to produce even more subtle colour variations.

Stylishly finished in graphite and silver, Derwent Graphitint works well with all other Derwent media. It is available individually, in a blister pack of 6 or in assorted tins of 12 and 24.

...a really subtle range of colours, very suited to autumn landscapes with lovely muted moody greys and browns. The feel of the pencils is really good, smooth and rich but not too soft so you are able to build up a rich dark colour."
Carole Grey

"Derwent Graphitint are absolutely beautiful as a drawing and painting medium. The pencils sharpen to a fine point and I love the transparency of the colours, which enables me to paint many washes without losing any of the depth of the colour."
Angela Gaughan

"Graphite has changed. Surprise your art and yourself with these delightful pencils. Graphite will never be the same again."
David Cook

1. Using Autumn Brown put down a wash about a third of the way along then before it dries add Meadow wet into wet over lapping the colours. Once dry use a rubber to pull out highlights.
2. Then once dry use Autumn Brown dry to draw details on the seaweed.

1. First add Sage as a wash background colour.
2. Then using Ocean Blue start to detail the scales as a wash.
3. Finish with Dark Indigo using wet and dry techniques.

1. First apply Ocean blue and Aubergine dry onto the surface
2. Then wash through using clean water, once dry use a rubber to pull out detail.
3. Go back to Ocean blue and draw over the wash for your detail.
