

GETTING STARTED WITH

Airbrush

What IS An Airbrush?

an airbrush is a tool that uses AIR to spray PAINT onto a surface. Because the brush never touches the surface, the artist is able to achieve a smooth, stroke-free look.

WHAT YOU NEED:

- an airbrush
- hose
- air source
- color & jars
- cleaning solution
- surface (canvas, illustration board, or paper.)
- stencils or frisket film for masking off areas.
- corresponding needles & tips.

* KITS ARE AVAILABLE THAT WILL INCLUDE MOST OF THESE ITEMS.

SINGLE ACTION-trigger controls only air flow

DOUBLE ACTION-trigger controls

paint & air flow.
press **DOWN** for air and
BACK for paint

tip

small needles & tips for fine detail work.

medium needle & tip

large needle & tip good for backgrounds.

CLEAN OFTEN &

thoroughly
to avoid damaging your needle. Run water through the brush between colors, and when finished clean with an airbrush cleaner or solvent.

PAINT

Jars & cups are available in many sizes

Air Source

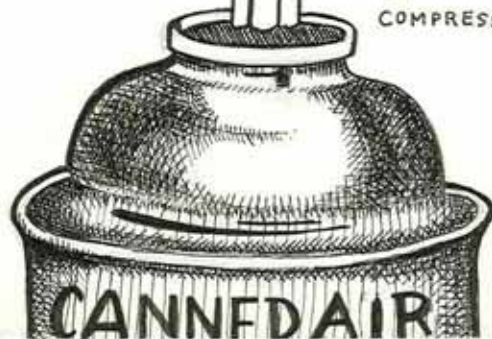

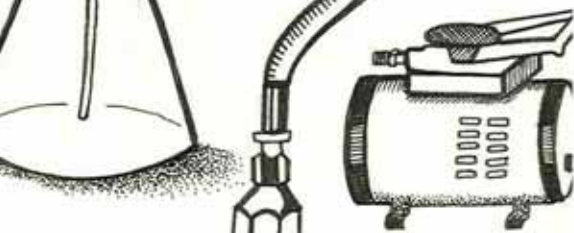

Canned air is portable, lightweight & good for small projects. A COMPRESSOR is a great investment for the more serious airbrush artist.

HOSE

COMPRESSOR

airbrush paints, inks & dyes are great for most applications. Other paints can be modified to suit the airbrush.

PARTICLE MASK

ALWAYS FOLLOW SAFETY INSTRUCTIONS
